Final-Year Data Science Student aspiring to become a Junior Data Engineer, with hands-on experience in Cloud (AWS, GCP) & Data Engineering tools, Apache Iceberg, PostgreSQL, and Apache Airflow.

Formal & Non-Formal Education

Institut Teknologi Sumatera - Lampung Selatan, Lampung Aug 2022 - Nov 2026 (Expected)

Final Year Undergraduate Data Science

- Developed the official website for the ITERA Innovation Incubation Program, International Conference on Sustainability in Sciences for the Future (ICSSF), and catalog management website for the ITERA Pharmacy Department.
- Final thesis: Implementing a Data Lakehouse for Data Integration Using the Medallion Architecture at the Lembaga Penelitian dan Pengabdian (LPPM), Institut Teknologi Sumatera.

AWS Orbit Future Academy (Batch 12) - Jakarta (Remote) Jul 2025 - Oct 2025

- Completed 3 months of intensive learning on AWS concepts to gain hands-on experience with the AWS Cloud Platform
- Prepared for the AWS Certified Cloud Practitioner (CCP) certification.

Projects & Experiences

Bruin - Berlin, German (Remote) Jun 2026 - Present

Content Blog Writer (Data Engineer)

Bruin is a unified analytics platform that brings together transformation, data quality, observability and governance.

- Developed an end-to-end analytics solution by integrating Bruin with RaspberryPI 3B 2017, BigQuery, Gemini, and Streamlit to enable data processing, AI-powered insights, and interactive visualization for competition.
- Secured 1st Place in the Bruin & DataTalksClub Zoomcamp Data Engineering Competition under the LinkedIn Insights category.
- Authored a technical article on IoT and edge device integration in collaboration with Bruin in getbruin.com/blog.

ProjekDOS - Jakarta (Remote) Feb 2026 - Present

Research & Development

@projekdos in <https://projekdos.com>

- Initiate Data Engineering content on @projekdos Instagram, developing structured content strategies, templates, and a content planner.
- Scaled the account from 100 to 600+ followers within one month, achieving +500% growth.

Finalist PAN-SEA AI Developer Challenge (\$10,000 Credits) - International Aug 2025 - Sep 2025

Hackathon

AI Singapore Competition

- Built a data pipeline to collect, scrape and clean, and structure more than 1,000 Supreme Court decisions pdf documents and structured text from the Republic of Indonesia.
- Designed and implemented a Retrieval-Augmented Generation (RAG) legal assistant that leverages Supreme Court decisions to provide context-aware responses.
- Awarded USD 10,000 in Google Cloud credits, enabling the development and deployment of the project's MVP infrastructure for 1 month.

Winner Dev.to AssemblyAI Hackathon Challenge (\$1000) - International Dec 2024

Hackathon

AssemblyAI is an applied AI company that provides advanced speech-to-text, voice agent, and audio intelligence APIs.

- Developed a full-stack web system, including a web client for user reporting and a separate web client for a dashboard monitoring system used to track SOS distress reports.
- Integrated an AI-based LLM service, AssemblyAI, into the entire system.
- Leveraged LeMUR to build LLM-based features on top of voice data, enabling advanced voice analysis and automated response capabilities.

PLN Nusantara Power - UP Sebalang, Lampung Dec 2025 - Jan 2026

Data Analyst & Engineer Intern Project Based

PT PLN Nusantara Power (PLN NP) is the largest power generation company in Southeast Asia, with an operational capacity exceeding 23,000 MW. It is a strategic sub-holding of PT PLN (Persero), Indonesia's state-owned electricity corporation.

- Assisted the HSSE Division in developing an internal safety reporting dashboard using Streamlit to improve monitoring and reporting

processes.

- Designed and implemented ETL pipelines using Python and PostgreSQL to integrate data from internal HSSE systems into the enterprise Data Warehouse.
- Processed and transformed over 100+ safety reporting records, ensuring data accuracy, consistency, and availability for operational analysis and decision-making.

PT Metra Digital Media by Telkom Indonesia - Jakarta

Jun 2025 - Jul 2025

Digital Analytics Intern

PT Metra Digital Media (MDMedia) is a subsidiary of PT Telekomunikasi Indonesia Tbk (Telkom)

- Conducted crawling and scraping of Supreme Court of the Republic of Indonesia decision data using Scrapy, with Apache Airflow as the orchestrator and task scheduler
- Built Supreme Court of the Republic Of Indonesia data mart with Clickhouse database.

Community & Organization

Data Science Indonesia - Jakarta

Mar 2025 - Present

Volunteer of Graphic Design

@datascienceindo

- Designing posters for events and creating engaging visual stories to support event promotion and audience engagement across digital platforms and became volunteer for 1 Decade Data Science Indonesia event

Skills, Awards & Other Experiences

- **Achievements** (2024): 1st Winner DEV.TO AssemblyAI Hackaton Challenge - International Competition
- **Achievements** (2024): 1st Newform UI/UX Challenge - International Competition
- **Achievements** (2024): 1st KIT Competition UI/UX Design - Institut Bisnis dan Informatika Darmajaya
- **Achievements** (2021): 2st Web Design - SMK Telkom Sidoarjo
- **Achievements** (2022): Finalist Software Engineering Scholarship Competition (SECS) - Telkom University
- **Hard Skills:** UI/UX, Figma, Web Development, Node JS, Python, Streamlit, Data Science, Data Engineer, Apache Airflow, AWS
